Muhammad Awais Javed

LinkedIn | +92 3139717778 | awaisjaved089@gmail.com | GitHub

Skills

- Java, Kotlin, Spring Boot, Docker, AWS, EC2, ELK (Elasticsearch, Logstash, Kibana), Datadog, Git, GitLab, CI/CD,
- Kafka, KSQL, MySQL, MongoDB, POSTMEN, Kubernetes, Agile, Jira, Confluence, Linear, Notion, Keycloak, Liquibase, Reactive Java, Spring WebFlux

Experience

Senior Backend Engineer **Compakt Automatisering B.V.** *Remote* **03/2026 – Present**

- Worked on the AMICE integration, submitting meldingen to LMA and achieving 90% accuracy.
- Built with Java, Spring Boot and Microservices architecture, using Apache CXF for the AMICE SOAP web service.
- Built a secured REST API (JWT) with Swagger documentation and Spring Actuator health checks for CI/CD.

Senior Backend Engineer **Luna Partner** *Italy (Remote)* **04/2025 – 02/2026**

- Development for a large ERP platform, shaping architecture, API design, and delivery practices.
- Built reliable REST services and data pipelines with strong testing, monitoring, and performance focus.
- Drove security and access control across the stack, integrating authentication/authorization and role-based policies.
- Streamlined data modeling and migrations, enabling smooth releases and maintainable schemas.
- Delivered scalable document and export workflows (PDF/Excel) used across finance/HR modules.
- Collaborated with stakeholders to turn requirements into clear roadmaps and shipped features end-to-end.

Senior Backend Engineer **Tekrowe Digital - Consultant at Telenor GSS** *Islamabad (Hybrid)* **07/2024 04/2025**

- Lead the team and developed microservices for Telenor Finland (DNA) using Java, Spring Boot, and Microservices architecture.
- Uses Coupa APIs for integration to create POs and Invoices automatically from ERP to Coupa for DNA.
- Worked directly with the customers, gathered the information and provide them a solution for PO fetching from ERP to Coupa.
- Build a monitoring solution for POs which made he Purchase Order correct timely if any of them failed in migration and achieved 90% accuracy in PO flow from ERP to Coupa.

Backend Engineer **Tekrowe Digital - Consultant at BRKZ** *Islamabad (Hybrid)* **02/2024 – 07/2024**

- Developing backend solutions at BRKZ using Kotlin, MongoDB, and Microservices architecture.
- Utilized Linear, Notion, and Datadog for efficient project management and monitoring.
- Worked with Agile methodologies to streamline development and participated in the full software development lifecycle.
- Ensured seamless integration of code changes, and error-free releases, and conducted thorough code reviews.

Java Developer (Team Lead) **RootPointers** *Lahore (Hybrid)* **08/2022 - 02/2024**

- Architected microservices for a critical application, optimizing scalability and resilience.
- Led requirement gathering and documentation efforts, ensuring alignment with stakeholders.
- Configured ELK Stack for real-time distributed logging, enhancing monitoring capabilities.
- Implemented GitLab CI/CD pipelines, Docker Hub, and Kubernetes with Helm, streamlining deployment.
- Contributed to core development, improving system functionality and performance.
- Managed Docker-based microservices deployment, optimizing resource utilization.
- Mentored and led a 3-person team, fostering innovation and collaboration.

Associate Software Engineer - Integration **Evamp&Saanga** *Islamabad, PK* **10/2021 - 08/2022**

- Successfully delivered the Self-Care Solution project for Korek, a leading telecom company in Iraq.
- Implemented the ELK stack with Kibana dashboards for proactive issue resolution and process monitoring.
- Enhanced application security with critical fixes, including Difi-Helmen and Force Update features.
- Designed and developed scalable components using Java Spring Boot.
- Utilized PuTTY and WinSCP for efficient deployment of executable JAR files

Java Trainee Engineer **Funavry Technologies** *Islamabad, PK* **08/2021 - 10/2021**

- During my internship, I played a key role in developing the TABOOR QMS application using Java and SpringBoot. I integrated Elasticsearch for improved search and indexing and utilized MySQL for efficient data storage and retrieval. This experience enhanced my skills in backend development and database management.

Senior Member **COMSATS Literary Society** *Pakistan* **02/2019 - 06/2021**

- Worked as Senior Member in COMSATS Literary Society, organizing events in university and competing in several debating competitions.

Education

Bachelor of Science **COMSATS University Islamabad** *Pakistan* **09/2017 - 07/2021**

- Major in Computer Science

Mentorship

- Led a Discord community in AT Hub, providing mentorship and career advice to Software Engineering students.
- Tutored Computer Science students in Intro to Programming and Spring Boot.

Certification

- Docker For Java Developers (LinkedIn Learning) • Java Beginner to Advance (Coursera) • Spring Boot Master Class (AmigosCode)
